SUMMARY

I am a senior student in the Management Information Systems department at Pamukkale University. I have been actively developing software for over 5 years using Unity and C#. During this process, I have worked not only on game mechanics but also on Steam API integration, data management, and automation tools that facilitate marketing processes. I have 2 projects published on Steam. I have strived to gain experience in every step of a project from the idea stage to reaching the end user. I am looking for an internship opportunity where I can improve myself in the software industry.

TECHNICAL SKILLS

Languages:

- C#, JavaScript, Python

Frameworks & Technologies:

- Unity, React, React Native

Tools:

- - Git, Axios, REST APIs
- - Blender, Aseprite, Photoshop, Audacity, Canva,

PROJECTS

Influencer Analytics & Data Automation Tool 2026-In Progress

- - Developed a web-based data collection and analysis tool using JavaScript
- - Integrated Twitch and YouTube APIs to fetch influencer data (viewers, subscribers, links)
- - Implemented data scraping, filtering, and processing logic
- - Automated marketing workflows by transforming manual research into scalable processes
- - Technologies: JavaScript, HTML/CSS, Axios, REST APIs

Bug Bane (Steam – Early Access) | Solo Developer 2024-In Progress

- - Designed and developed the entire gameplay architecture using Unity and C#
- - Implemented real-time systems including event-driven mechanics and state-based AI
- - Optimized performance using object pooling and efficient memory management techniques
- - Reached 1500+ users through demo distribution and managed release on Steam
- - Handled deployment, updates, and community engagement processes

The Pandemic Papers | Solo Developer 2026-In Progress

- Architected and programmed a 2D simulation game in Unity/C#, securing 2nd Place at the University Graduation Project Presentation.
- Designed a dynamic document-handling and verification system utilizing complex UI state management and custom physics interactions.

Foes of Legacy (Steam – Early Access) | Developer 2024-2026

- - Collaborated in a 2-person team to build character and ability systems
- - Focused on scalable and maintainable code architecture
- - Contributed to a demo reaching 1200+ users.

EDUCATION

Pamukkale University | 2022-2026

Management Information Systems (BSc)

- GPA: 3.03

ACHIEVEMENTS

2nd Place | 2026

University Graduation Project Presentation

The Pandemic Papers - Computer Game

LANGUAGES

- Turkish (Native)
- English (Intermediate)
