SUMMARY

Unity developer with 5+ years of hands-on Unity and C# experience. Developed and released two Steam Early Access titles, independently and in a two-person team. Seeking a full-time Unity Developer role; open to remote work and relocation depending on location.

TECHNICAL SKILLS

Development: Unity, C#, gameplay programming, enemy AI, UI implementation, ScriptableObjects, object pooling, game feel, Git
Production tools: Blender, Photoshop, Krita, Aseprite, Audacity
Additional languages: JavaScript, Python

EXPERIENCE

Chess Duello | Marketing & QA Intern | Jun - Sep 2026

- Prepared investor presentations and independently redesigned App Store screenshots to support App Store optimization (ASO) and an updated visual direction.
- Built a social media content generator and created social media posts.
- Performed application quality assurance (QA) testing and contributed to game-based learning work.

SELECTED GAME PROJECTS

Bug Bane Survivors | Solo Developer | Steam Early Access | 2024 - Present

- Built the game in Unity/C#, including gameplay systems, state-based enemy AI and object pooling.
- Implemented ScriptableObject-based mutation definitions and a timed memory-chest reward interaction; handled the Steam release and updates.

Foes of Legacy: Survivors | Developer | 2-person team | Steam Early Access | 2024 - 2026

- Developed player abilities and core player features; contributed to enemy AI, UI and optimization in a two-person Unity team.

Counter Smash | Solo Developer | Mobile portfolio prototype

- Built a Unity 6 physics prototype with nonlinear charge timing and a narrow perfect-shot window.
- Layered hit stop, camera shake, particles and audio variation to create responsive impact feedback.

Oddroot Farm | Solo Developer | PC | In Development

- Built connected farming, barn inventory and machine-production systems with day-based progression, daily upgrade choices and weekly tribute payments.

The Pandemic Papers | Solo Developer | Graduation Project | 2026

- Built document verification, UI state management and custom physics interactions in Unity/C#; awarded 2nd place at the university graduation project presentation.

EDUCATION

Pamukkale University | BSc, Management Information Systems | 2022 - 2026
Graduated in 2026 | GPA: 2.96

Anadolu University, Open Education Faculty | Bachelor's in Public Finance | 2026 - Present

LANGUAGES

Turkish: Native | English: Intermediate
